Meeting Agendas and Action Items

Date	Agenda Items	Notes	Action Items
2017-03-07	PKPARM: ☐ CDISC-2661 ☐ CDISC-2806 ☑ CDISC-2817 PKUNIT: ☑ CDISC-2787	CDISC-2661 and CDISC-2806: Why these Descriptive/Aggregate Stats terms need to be added to the PKPARM codelist? Why can't NSVs for Standard Error or Error be created, as extra columns attached to the SEND PP domain? This way the NSVs can be used together with all parameter values in the PKPARM codelist. Also, if the Standard Error and Error values are regularly collected data, perhaps the SEND PP domain is missing variables to properly represent these findings?	☑ Discuss Dave's feedback from Craig ☑ Invite Craig to the next PK meeting.
