Subject: C-SSRS example errors

Hey Steve,

Here's the info on the C-SSRS error:

1) Please click this url: https://www.cdisc.org/system/files/members/standard/foundational/qrs/C-SSRS_Baseline%20v1.2%20Annotated%20CRF.pdf
2) Look at page 3, the last question: Potential Lethality: Only Answer if Actual Lethality=0
3) Please click this url: https://www.cdisc.org/system/files/members/standard/foundational/qrs/SDTM%20QS-C-SSRS%20BASELINE%20v1.2%20Approved.pdf
4) Look at page 7, the examples are: CSS0121B=1 & CSS0121C=1, CSS0122B=4&CSS0122C=2. The example is not suitable, because only when CSS0121B/ CSS0122B choose "0" then answer the CSS0121C/ CSS0122C respectively.
5) The C-SSRS since last visit is the same. https://www.cdisc.org/system/files/members/standard/foundational/qrs/C-SSRS%20Since%20Last%20Visit%20v1.1%20Annotated%20CRF.pdf & https://www.cdisc.org/system/files/members/standard/foundational/qrs/SDTM%20QS-C-SSRS%20SINCE%20LAST%20VISIT%20v1.1%20Approved.pdf

Thx!
