

Introduction to SHARE, iSHARE, eSHARE provided
Location, content and how to access download area described

Timeline by when access would be possible?

Under consideration

Can we access eSHARE from our metadata repository?

Currently not recommended, plan to create a software accessible
version, still uncertainties

Mapping CDASH to SDTM?

Is available, export of machine readable format under development

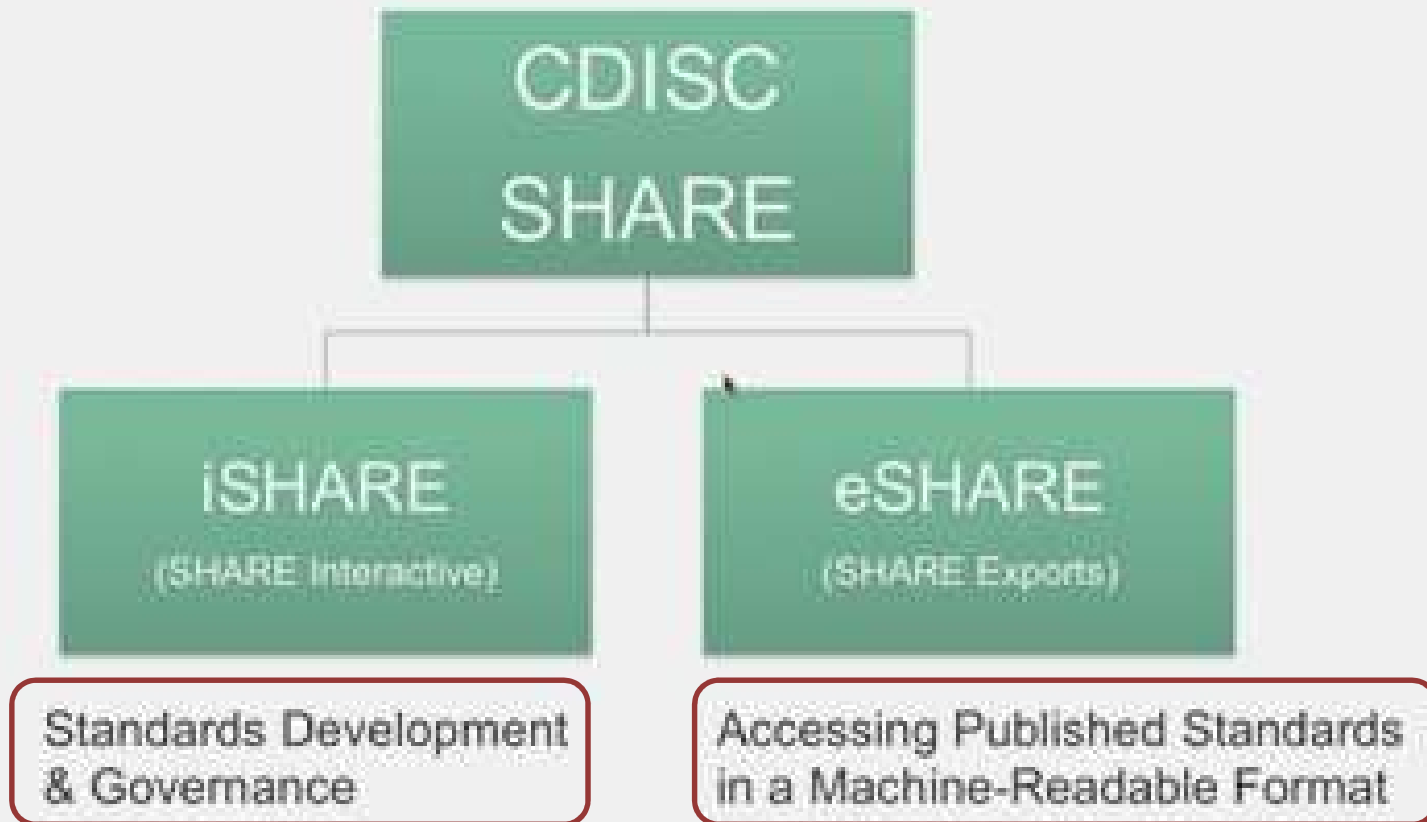

Will PDFs go away at some point in time?

No, but way how to organize the information may change.

What is SHARE?

- SHARE is a standards metadata repository for authoring, governing, and publishing CDISC standards
- SHARE combines
 - SOA Semantics Manager
 - ISO 11179 Metadata Model
 - CDISC Standards Model
 - CDISC Foundational and TA Standards
 - Controlled Terminology
 - Exports to ODM, Define-XML and RDF
- Enables the development of a consistent, end-to-end standards model

SHARE Software: iSHARE & eSHARE

Access to eSHARE does not require access to iSHARE
