

CDISC GS User Group Meeting

Mapping Topics

15 March 2016

Element	Suggested Algorithm
RFICDTC	IC date as collected
RFXSTDTC	First start date from EX, $\min(\text{EXSTDTC})$
RFSTDTC	First start date of STUDY DRUG from EX, $\min(\text{EXSTDTC})$ of STUDY DRUG.
RFXENDTC	Last end date from EX, $\min(\text{EXENDTC})$

Element	Suggested Algorithm
RFENDTC	<p>Last DSSTDTC with DSCAT Disposition Event??</p> <p>According to the IG: Reference End Date/time for the subject in ISO 8601 character format. Usually equivalent to the date/time when subject was determined to have ended the trial, and often equivalent to date/time of last exposure to study treatment.</p>
RFPENDTC	<p>Latest available –DTC typically from DS, AE, SV</p> <p>According to the IG: Date/time when subject ended participation or follow-up in a trial, as defined in the protocol, in ISO 8601 character format. Should correspond to the last known date of contact.</p> <p>Assumptions:</p> <p>14. RFPENDTC will be the last date of participation for a subject for data included in a submission. This should be the last date of any record for the subject in the database at the time it's locked for submission.</p>
