

Mapping of Tx Datasets

CDISC User Network Meeting
Heidelberg, February 20, 2018

Kurt Hellstern

kurt.hellstern@hands-on.ch

Concept & Characteristics

- **ODM Set-up and SDTM mapping in one software shell**
- **Add Tx data to EDC tool (ODM)**
 - Use eCRF data-inprint functionality to document contents, e.g for team approval
 - All data in the same place
 - Included in ODM archive file at the end of the study
- **Click and drag functionality**
- **A step towards end-to-end**
- **(almost) SAS-free data management and its SDTM delivery**
- **Handover to SAS programmers for ADaM**

Comment: This short presentation was done online using the XClinical Marvin study (eCRF-) composer and (SDTM-) tabulator. Thus, no further Slides in this file.
