# A brief history

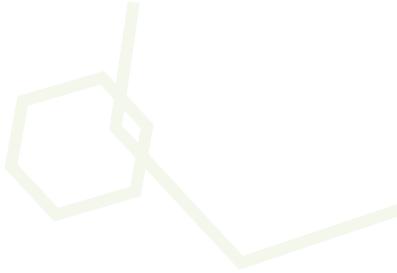

# Provisional vs Final

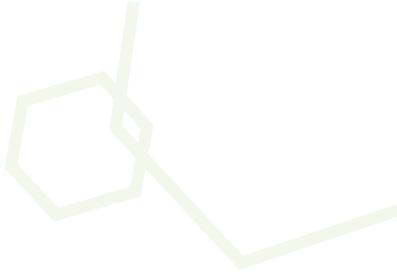

- *Provisional use means that the standard has been published for initial use, and is dependent upon completion of other standards*
  - *The SDTM Model*
  - *Controlled Terminology (codelists referenced in the SDTMIG are published)*
  - *Conformance Rules*
  - *Metadata in SHARE*
  - *Educational learning objectives*

# Grandfathered Standards

- ***SDTMIG v3.3 is grandfathered such that it will be published as Final (as opposed to Provisional) even though the SDS team is still working on the associated conformance rules***
  - ***Any standard that has already passed public review will be eligible for final publication in 2018***
  - ***Any standard that has already passed cross-team internal review and been approved by SRC or GGG to proceed to public review***
    - Will be eligible for **Provisional** publication in 2018
  - ***Publication guidelines:***
    - Still must be handed over to the publication team by cut-off date
    - Will be prioritized according to specific criteria
