# PointCross Life Sciences
eDataValidator evaluation
GUF - 3/10/2019

www.pointcross.com

About the eDataValidator

The eDataValidator from PointCross Life Sciences will be a cloud hosted solution powered by AWS.

With the eDataValidator, you are able to:

- Validate study data in compliance with FDA Business Rules & Validator Rules, PMDA Validator Rules and CDISC Conformance Rules.

- Define.xml validation of SDTM, ADaM and SEND datasets

- Verify submission terminology coding with CDISC Controlled Terminologies, and subscription terminologies in MedDRA, WHODD and SNOMED.

- Dashboard to verify the validation outcomes and to monitor the datasets quality progression during preparation and packaging for submissions.

Evaluation process

- Free Evaluation period of 2 months from registration. Sponsors and CROS

  can register from November 2019 to June 2020

- Kick off on November 20th
